

# Exposure Unit

## Letralite Exposure Unit

Ultraviolet (UV) Light Exposure Unit

The Letralite Exposure Unit is designed to provide exceptional imaging results on all IKONICS Imaging photoresist films. The unit's unique compact cylindrical design makes it simple to operate and assures consistent results when used properly. Refer to individual photoresist user guides for specific processing information.

The Letralite is a compact, economical unit used to expose photoresist films. A unique cylindrical compression frame wraps around a 15 watt black fluorescent light bulb for uniform exposure over an 11" x 14" area. The timer can be dialed to 15-second intervals and turns off automatically.

*Use this unit under safe or yellow light conditions.*
